

WHAT IS CLAIMED IS:

1. A mobile phone securing device, comprising:
 - a plate member having a connecting member that is connectable to an external object to be connected; and
 - 5 an enclosing member which is a band-like member connected to said plate member so as to form a confining space for securing a mobile phone therein.
2. The mobile phone securing device as claimed in Claim 1, wherein said connecting member of said plate member is an adhesive provided on a backside thereof.
- 10 3. The mobile phone securing device as claimed in Claim 1, wherein said connecting member of said plate member is a hole for passage of a screw therethrough.
4. The mobile phone securing device as claimed in Claim 1, wherein said enclosing member includes two hooks-and-loops fasteners each of which has one end secured to said plate member and another end overlapping and engaging each other.
- 15 5. The mobile phone securing device as claimed in Claim 1, wherein said enclosing member is an elastic band with two ends secured to said plate member.
